

**FAR – Floodlight
Architectural Round back
Knuckle Mounting**
High Pressure Sodium 70 - 150 W
Metal Halide 50 - 175 W

DESCRIPTION

The FAR floodlight is an architecturally appealing lighting instrument with superior form and fit. While made of rugged, long lasting materials, it's rounded back design and soft rounded edges make it architecturally desirable even in high visibility areas. Suitable for up to HPS 150W or MH 175W. U.L. listed for wet locations.

APPLICATION

Suitable for applications such as facades, signs, landscape lighting and security lighting around buildings. Use where an architecturally pleasing fixture is desired due to day time visibility.

HOUSING

The housing is made of high pressure die cast aluminum and finished in a textured dark bronze polyester powder coat paint finish for lasting corrosion resistance. Rounded edges and stylish grooves on the back of the fixture add to its aesthetic appeal.

BALLAST

HPS ballasts are Reactor – NPF. Metal Halide ballasts are either High Reactance or Constant Wattage Autotransformer ballasts. Minimum starting temperature is -40°F (-40°C) for HPS and -20°F (-30°C) for MH.

SOCKET

Medium base, 4KV pulse rated porcelain socket for HID lamps. Positive latching thermoplastic socket for fluorescent lamps.

MOUNTING

Heavy duty, versatile knuckle mount allows mounting on walls, floors and into 1/2" NPS outlet boxes.

REFLECTOR

Computer designed, die formed, anodized aluminum reflector is designed for low glare and high efficiency.

DOOR / GASKET

Door frame is held on with a continuous piano hinge and closes with stainless steel captive hardware resulting in a precise and secure fit. Silicone rubber gasket for long life.

LENS

Clear tempered glass, impact and heat resistant.
